

This patented heating system for whirlpool baths captures and recycles the waste heat “energy” produced by the pump/motor and delivers that heat to the bath water. The *Thermal Wrap* system will maintain water temperature and prevent heat loss caused by the whirlpool action. The system allows the motor to run cooler; increasing the motors longevity and efficiency. There are no moving parts and nothing to wear out.

Snap-It-On... And Enjoy Free Heat!

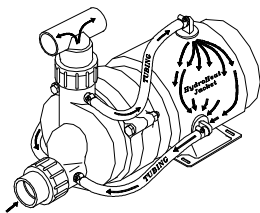

Retrofit Kits

For new and existing installations

**Easy Installation
Jacket Snaps Over Motor**

**Water Circulates Through
Jacket Collecting Heat
Generated By Pump Motor**

Efficient ...

- Patented design, over 500,000 in use.
- Special thermal conductive inner heat transfer liner.
- Models for any pump, including motors with external capacitor(s).

Economical ...

- Maintenance free – no moving parts to wear out.
- Helps keep motor cooler increases it’s longevity and efficiency.
- Cost less than electric heaters.

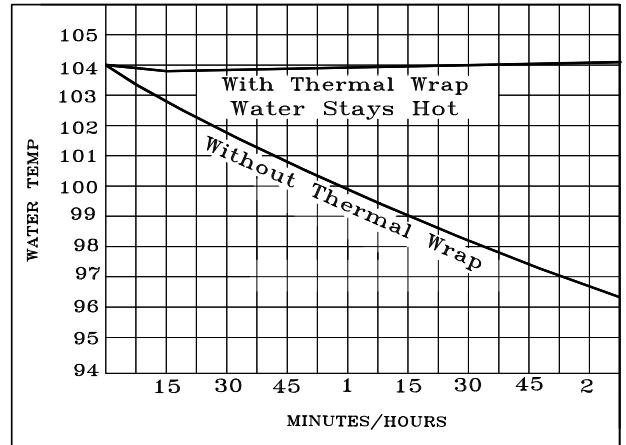

Safe ...

- Manufactured of non-conductive materials.
- Non electrical – no additional electrical circuits required for installation.
- Self draining design.
- UL Recognized Component.

“Thermal Wrap”

**Superior Quality and Value
The Original Heat Transfer System
For Whirlpool Baths and Spas**

Bath Water Temperature Graph

Temperatures are approximate and may vary according to motor make and operating conditions

**Snap-On Installation
No Special Tools Required**

**Pump Has Built-On Supply Ports
For An Easy Installation**

Heat Transfer Systems are recognized under the Component Recognition Program of Underwriters Laboratories Inc.
